

## CONTROLPRO CONNECT

**MAXIMIZE UPTIME  
AND OPERATIONAL  
EFFICIENCY**

Cloud Connect

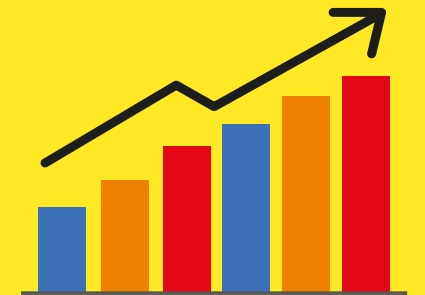

**Would you like to gain operational efficiency by real-time data, e-mail alerts and online support at the touch of a button?**

**Would you like to get accurate insight into the performance of your filter installation?**

**Would you like to achieve a clean, safe and efficient working environment by maximizing uptime of your filter installation?**

## **CONTROLPRO CONNECT**

**ControlPro Connect is an advanced web portal from Plymovent that gives you the power to monitor, manage and control any number of filters at a glance.**

From a PC, tablet or smartphone your installation can be monitored in real-time giving you the ability to see if your filter is running smoothly and if any remedial actions are needed.

Online filter parameter settings can be optimized, filter working hours can be changed to suit different shift patterns either for all filters or individually. Alerts are delivered directly via email. And, if you want, the Plymovent ControlPro Connect has the option to give access to online support and intervention by trained dedicated Plymovent service representatives.

### **Data and insights**

Historical data of your filter performance is stored for easy analysis. Reports about the efficiency of your installation are available in graphic or tabulated form.

With the stored data you will get accurate insights in trend lines and deviations. Data driven decisions can be made to optimize your filter operation. By monitoring the easily accessible data from your installation, planned maintenance can be organized better to keep down the costs and maximise uptime. In combination with a service and support agreement you can benefit from your high performance Plymovent filter installation(s) at all times.

**With the Plymovent ControlPro Connect expectations will be exceeded. Not only today but also in the future!**

**Real-time status  
for all the filters**

**Preventive maintenance  
planning**

**Detect trends  
and deviations**

**Detailed analysis of  
equipment performance**

**Control the filters from  
any compatible device**

**Preventive maintenance  
at your fingertips**

**Maintain reliability  
through real-time insight**

**Efficient service and  
maintenance operations**

**Online support  
subscriptions\***

## ControlPro Connect

Dashboard	Provides an overview at a glance of the main functions and status.
Factory map	Upload your factory map and visualize your filter installation with clickable icons by a simple user interface.
Real-time overview of installed base	Multi-level view of the installed filters: single, in groups or as a whole.
Real-time data of filter status	All relevant information of the filters and fans, showing filter pressure, energy consumption, dustbin level, alerts and warnings.
Historical data	<p>The following parameters are monitored and presented per week, month or year in clear graphic form to detect trend lines and plan preventive maintenance:</p> <ul style="list-style-type: none"> <li>■ Filter pressure</li> <li>■ Working hours</li> <li>■ Fan motor frequency</li> <li>■ Off and online filter cleaning cycles</li> <li>■ Energy consumption and savings</li> </ul>
Online filter parameter settings	All operational parameters of the ControlPro controller can be changed online.
Change parameters online at facility, department or individual filter level	<p>The following parameters can be changed for all or a group of products simultaneously:</p> <ul style="list-style-type: none"> <li>■ Start or stop</li> <li>■ Overtime</li> <li>■ Working hours</li> <li>■ Holidays</li> </ul>
Warnings and alerts	Real-time and historical overview on warnings and alerts.
E-mail push message of warnings and alerts	Receive an e-mail push message in case of warnings or alerts with description of recommended action.
Online support session	Start on request an online support session by your Plymovent service partner.
